SUBJECT INDEX

Acid hematein for histochemical diagnosis...67
Actinomycin-C, on normal and tumor cells.....49
Age factor, in lung cancer histology.....
Antigenic difference between sublines 57
Autoradiography, C^{14}-labelled DAB in liver. 253
———, tritium-labelled 4-nitroquinoline N-oxide. .....
Azo dyes, carcinogenic mechanism. 239
———, C^{14}-labelled. 253
———, Cong red index in carcinogenesis... 155
———, N-demethylation of 239
———, effect on pyruvate metabolism..... 135
———, pretreatment in neonatal stage 73
———, protein bound..... 253
Basic protein from tumor, effect on tryptophan pyrrolase..... 213
Basophilia, effect of Streptococci..... 121
Bicarbonate, in Crabtree effect.....
Cancer tissue, histochemistry .....
Carcinostatic compounds, electronic structure. 1
——— liver factor 197
——— nitrogen mustard peptides..... 191
Chelating enzyme, iron protoporphyrin...
Chromosome, alteration in tumors 257
———, alteration and organ affinity .....
Congo red index, in azo dye carcinogenesis. 155
Crabtree effect.....
DAB, See Azo dyes.....
N-Demethylation, of aminoazobenzenes... 239
DNA contents in two tumor sublines..... 203
DPN metabolism, effect of nitroquinoline...89
Electronic structure, carcinostatic compounds..... 1
———, of urethan 127
Esterase, in skin carcinogenesis .....
Friend virus, toxohormone from spleen... 179
———, glycolysis of spleen..... 185
Gastric cancer, mucosal 109
Gastric juice, protein in 15
——— biologically active components in...271
Glycolysis, effect of nitroquinoline 83
———, by mitochondria 97
———, of Friend virus infected spleen ... 185
β-Glycosidase, in skin carcinogenesis.....
Histochemical diagnosis with acid hematein 67
Iron protoporphyrin chelating enzyme, effect of toxohormone on .....
Leukemia, transmissible in mice..... 233
———, karyology of, in mice..... 257
Liver factor, carcinostatic 197
Lung adenocarcinoma, induced with 4-nitroquinoline N-oxide 149
Lung cancer,, age factor in.....
———, histological variation in .....
Methyl-bis-(β-chloroethyl)-amine N-oxide, resistance to 39
Methylcholanthrene, inactivation by guinea pig serum..... 247
Microspectrophotometric measurements of DNA 203
Mitochondria, anaerofic glycolysis by 97
———, staining in normal, precancerous and cancerous tissues .....
Nitrogen mustard peptides, anti-tumor effect 191
4-Nitroquinoline N-oxide, autoradiography in skin. .....
———, effect on azo dye hepatocarcinogenesis..... 165
———, histochemical study after painting .....

——, induction of lung tumor 149
——, induction of skin sarcoma in rats... 165
——, induction of nuclear inclusion ... 173
——, on DPN metabolism 89
——, on protein synthesis and glycolysis...83
——, tritium labeled. .....
Nuclear inclusion, induction by 4-nitroquinoline N-oxide. 173
Oncotrephin, effect on orotic acid incorporation .....
Orotic acid, incorporation into RNA .....
Osteogenic sarcoma, transplantable 225
P^{32} incorporation, effect of sarcoma virus .....
Phosphatases, in skin carcinogenesis.....
Precanceroces tissue, histochemical differences .....
Protein in gastric juice.....15, 27
Protein synthesis, effect of nitroquinoline 83
Pyruvate metabolism, in hepatocarcinogenesis..... 135
Resistance, mechanism of, to methyl-bis-(β-chloroethyl)-amineN-oxide.....39
Ribonucleic acid, staining in normal, precancerous and cancerous tissues.....
Sarcoma virus, effect on P^{32} incorporation .....
Sex difference in carcinogenesis 73
Skin carcinogenesis, esterase in.....
——, β-glycosidase in.....
——, phosphatases in.....
——, sulphydryl group in.....
——, with 4-nitroquinoline N-oxide .....
Streptococci, on basophilia..... 121
Sulfhydryl group, in skin carcinogenesis.....
Thio-TEPA, on normal and tumor cells ...49
Toxoharmone, on iron protoporphyrin chelating enzyme.....
——, from Friend virus infected spleen 179
Tryptophan pyrrolase, effect of tumor basic protein on 213
——, in tumor-bearing rats..... 219
——, relation of adrenal function to ... 219
Tumor-bearing animal, tryptophan pyrrolase in..... 219
Urethan, electronic structure 127
